## RELEVANT EXPERIENCE

### Undergraduate Research Assistant

Norman, OK

*Student Research Assistant*

*January 2026 – Present*

- Conducted a literature review on the current impact of AI on Open-Source Software and its communities
- Gathered and organized 5 or more academic sources and case studies to support ongoing research objectives
- Surveying with a popular open-source repository to gauge maintainers, reviewers, and contributors' sentiment toward AI-assisted contributions

### OU Food Services

Norman, OK

*Student Assistant*

*January 2025 – Present*

- Assisted team members to deliver high-quality service.
- Maintained clean and organized work areas in compliance with regulations.
- Communicated with team members to ensure smooth kitchen operations

### Airport Transport - Global Engagement

Norman, OK

*Student Worker*

*Seasonal Position*

- Onboarded incoming international students, serving as a welcoming first point of contact.
- Facilitated student transportation by communicating with Airport Express staff.
- Adapted quickly to schedule changes and delays while ensuring smooth operation.
- Interacted directly with the public, answering questions and addressing interests.

## PROJECTS

### Pocket Penguin | *Flutter, Dart, Django, Docker*

August - December 2025

- Collaborating with team members to design and develop from concept to deployment.
- Applying DevOps practices, Agile methodology, and version control tools (Git) to streamline development and ensure code quality.
- Designing intuitive UI/UX interfaces to improve user experience and application usability.

### VelocityStaffChat | *Velocity API, Spicord, Discord API, JDA*

- Built a Velocity proxy plugin enabling in-game staff chat with Discord integration via Spicord.
- Implemented commands for sending, toggling, and reloading staff chat with robust configuration support.
- Designed permission-based access control for role-specific functions.
- Enhanced admin workflow through seamless plugin reloads and modular Discord channel integration

### MangoCube.net | *NamelessMC, Oracle Cloud, Ubuntu, Nginx*

- Deployed and maintained a website on Oracle Cloud using an Ubuntu virtual machine and Nginx.
- Designed and managed a backend database to store user data and feedback.
- Implemented SSL and MFA to secure admin access.
